Customer Journey Map

Date	20 October 2026
Team ID	Individual project (no team)
Project Name	Personalized Travel Itinerary Planner
Maximum Marks	2 Marks

Journey of a traveller using the Personalized Travel Itinerary Planner, from the first idea to a saved plan.

Phase of Journey	**Stage 1: Plan the trip**	**Stage 2: Generate the itinerary**	**Stage 3: Save and use the plan**
Actions What does the customer do?	- Opens the web app - Enters destination, days, budget - Chooses vibe and interests - Optionally taps Suggest destinations	- Clicks Build itinerary - Waits a few seconds - Reads the day-wise plan with timings, travel times and costs	- Clicks Save trip - Copies the plan as text - Reopens or deletes trips from Saved trips
Touchpoint What part of the service do they interact with?	- React trip form - Destination suggestion list	- Build itinerary button - Itinerary view - FastAPI + Groq in the background	- Save trip and Copy as text buttons - Saved trips list - Supabase database
Customer Thought What is the customer thinking?	- "Will it understand what I like?" - "Is this simple enough?"	- "Is this plan realistic?" - "Are the costs reasonable?"	- "I can keep this for later." - "I can share it with a friend."
Customer Feeling What is the customer feeling?	Curious but slightly doubtful	Impressed by speed, relieved to see a clear plan	Confident and organised
Process Ownership Who is in the lead on this?	Traveller (user input), frontend form	Backend (prompt building) and the AI model	Backend and database (storage), traveller (decisions)
Opportunities How can we improve this stage?	- Add destination autocomplete - Remember past preferences - Add group size	- Regenerate a single day - Show places on a map - Show loading progress	- Add login so trips are per user - Shareable trip links - Export to PDF
